

hygienic solutions

KUSCH+CO
by Nowy Styl

Protection against germs, microbes and co. Hygienic Solutions.

For all environments, where people get close to one another.

Hygiene guaranteed!

Series 3600/3650 Arn. Exemplary for a multitude of distinct variations within our kuschmed® Hygienic-Line and many other series in our portfolio.

Since 2006, we develop hygiene-oriented furniture. Initially, these products were solely available to the healthcare sector. We have extended our range to other areas in public spaces. These seating and table series are easy to clean and can be safely disinfected with all common disinfectants.

kuschmed®
HYGIENIC-LINE

Certified safety

High dynamic load capacity

Three seat heights

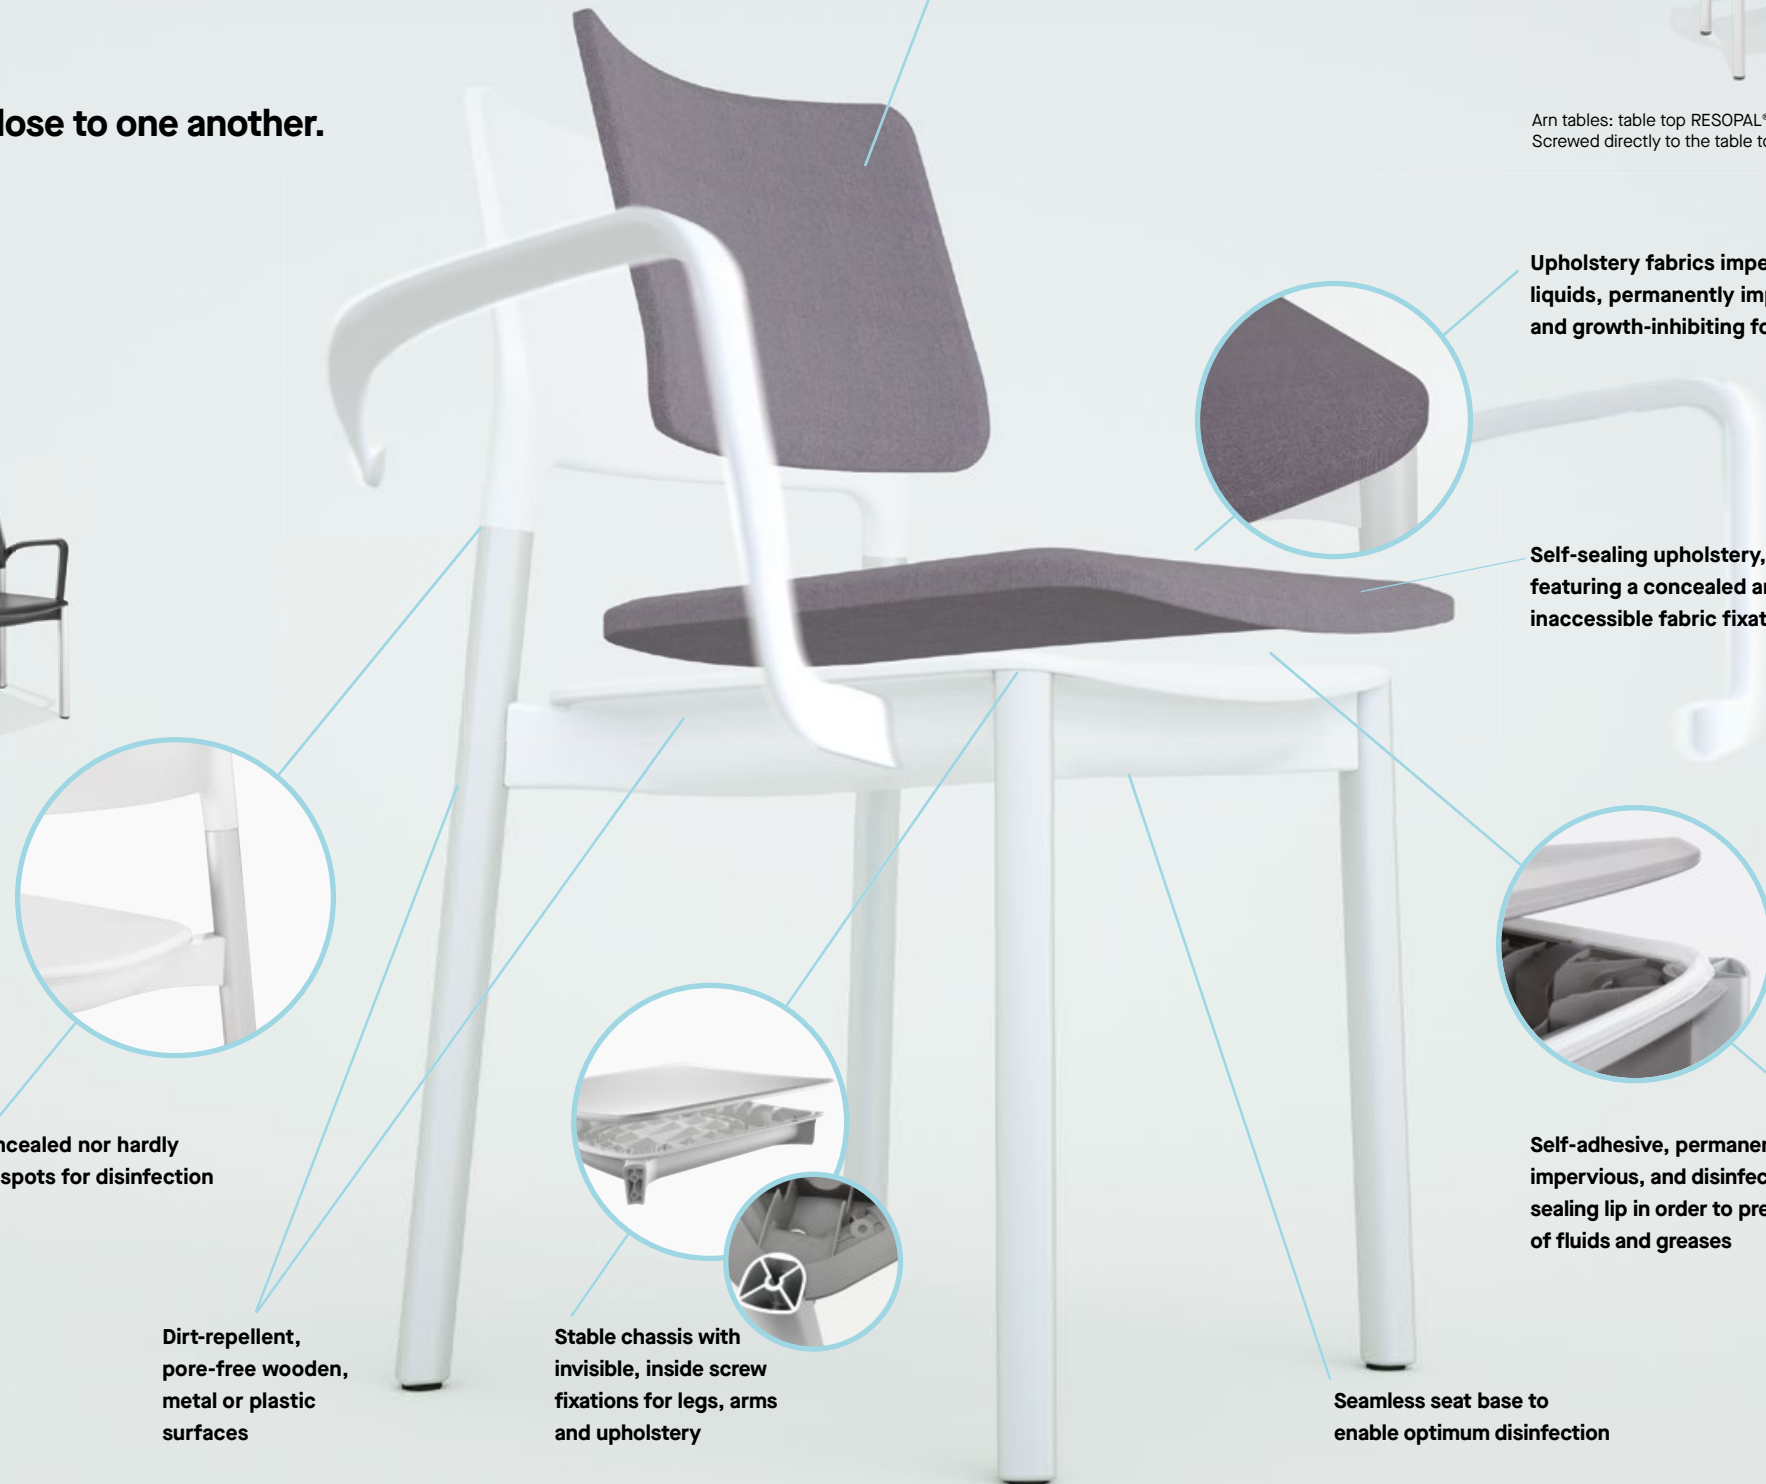

Fire Prevention

The Covid-19 pandemic is pushing everyone to rethink their hygiene concept.

Surfaces chosen as to provide the least possible adhesion to germs, microbes and mildew

Arn tables: table top RESOPAL® Antibacterial. Either wooden or aluminium legs. Screwed directly to the table top.

Upholstery fabrics impervious to liquids, permanently impervious too and growth-inhibiting for germs

Self-sealing upholstery, featuring a concealed and inaccessible fabric fixation

Self-adhesive, permanently hygienically impervious, and disinfectant-compatible sealing lip in order to prevent the ingress of fluids and greases

Seamless seat base to enable optimum disinfection

Neither concealed nor hardly accessible spots for disinfection

Dirt-repellent, pore-free wooden, metal or plastic surfaces

Stable chassis with invisible, inside screw fixations for legs, arms and upholstery

Options for even more hygienic safety:

All contact surfaces, seat supports, seat areas, backs and arms as well as the either wooden or aluminium legs are contaminant- and emission-free

- antibacterial coated or
- sealed with a bacteriostatic coating

Additional advantages:

- Actively bacteriostatic coatings near the contact surfaces
- Drastically reduced soiling of the plastic surfaces, e.g. denim stains
- Pore-free plastic surfaces prevent the ingress of liquids, offering a long-term protection against soiling
- Improved cleaning properties
- Increased scratch-resistance and less visible wear and tear of the surfaces
- Compatible with most colourless, officially approved disinfectants if used acc. to the manufacturer's instructions, e.g. Dismozon, Bacillol AF, Terralin protect, Perform. These disinfectants are capable of eliminating COVID-19 amongst others.
- No impairment of the fire prevention properties of plastic parts
- Surfaces are also suited for temporary outdoor use
