of products, designed to provide
ultimate comfort for passengers across
all spheres and airport staff on-site.*

V-Travel Bench

by Justus Kolberg

Crafted for major transportation hubs worldwide, the V-Travel Bench has defined the new standards of public seating. Customized for waiting areas, it is renowned for its aesthetics, engineering, functionality, and handling.

V-Travel Bench features a versatile collection of extremely functional individual elements that can be combined on a beam to create the desired effect for specific spheres.

The V-Travel Bench range offers a lot of mix and match possibilities:

- Seat shell made of PU material or fully upholstered with variety of fabrics for comfort and extreme durability
 - With or without the external and internal armrests, table top in the middle and power modules
 - A selection of special seats: raised seats for passengers with reduced mobility (PRM), and loungers for relaxation areas
 - Back to back connection offers two alternative connections:
 - connecting separate benches
 - frame back-to-back connection (one frame for sitting back-to-back)
 - Various options for floor fixation, in order to maintain the desired airport layout.
- As a result, V-Travel offers great flexibility to adapt to the space, requirements and standards of the airport.

V-Travel Soft Bench

by Justus Kolberg

Sharing the same design language, as V-Travel Bench, the V-Travel Soft Bench offers an enhanced travel experience, responding to the changing needs of modern airports.

Thanks to its modularity, V-Travel Soft Bench allows for a variety of configurations that can be perfectly suited for different spaces, regardless of their size. Functional elements elevate travellers experience while biophilic design elements give airport spaces more cosy and inviting character.

The V-Travel Soft Bench line offers an extensive and versatile selection of models, each accompanied by a wide range of customization options:

- Seat shell fully upholstered with variety of fabrics created for comfort and extreme durability
- Two types of armrests, cup holders and power modules
- Back to back connection offers two alternative connections:
 - connecting separate benches
 - frame back-to-back connection (one frame for sitting back-to-back)
- Various options for floor fixation, in order to maintain the desired airport layout.

V-Care Bench

by Justus Kolberg

As the world has undergone major changes over the last years, we want to transpose the solutions created originally for the highly demanding healthcare sectors, to the travel environments.

The result is V-Care Bench that outperforms the requirements of the normative standards.

V-Care Bench is made of polyurethane which absorbs body temperature, boosting the seating comfort. Additionally, the unique structure of the surface prevents from slipping down from the seat.

The seat shell has a unique anti-bacterial PU surface with silver ions, which reduces the growth of bacteria. It is not only easy to clean, but also safe to disinfect. Its surface is resistant to a variety of cleaning and disinfecting substances. Will not be damaged or discoloured.

V-Care Bench offers a lot of possibilities:

- With or without the external and internal armrests, internal and external table tops and power modules
- Raised seats for passengers with reduced mobility (PRM)
- Back to back connection
- Various options for floor fixation, in order to maintain the desired airport layout.

8000

by Studio F. A. Porsche

Public seating characterised by a new aesthetic design language. An exceptional synthesis of engineering and design, giving wings to your imagination and inspiration. Pure, powerful, progressive. A bench series designed to offer the best possible comfort to all passengers. Geared towards international airports, cruise centres, railway stations and other public areas.

The frame of the seat and backrest is made of perforated steel. Entirely made of metal. Hard-wearing and capable of coping with the stresses and strains of contract environments. The seat and backrest are ergonomically shaped to provide the best possible comfort.

Seat and backrests are available in polyurethane and in upholstery:

- Polyurethane integral foam with a finely textured surface offers an excellent comfort level, and is pleasant to touch. On top of this, the material is heavy-duty and low-maintenance. Available with a seat or a seat and backrest covered in PU foam.
- Upholstered variation unites both elegance and comfort. The ergonomically designed seat and backrest are made of multi-layered plywood and upholstered on both sides. Available with leather or durable imitation leather upholstery, as desired.

V-Travel Soft Seating

by Justus Kolberg

V-Travel Soft Seating – these stand-alone seat islands, characterized by a slender design language, are an architectural eye-catcher. Its excellent comfort level in combination with its capacity for up to 8 persons invites you to take a seat to relax and rest a moment.

Characterised by their unique design language, these seat islands function as a point of rest. Ideally suited for the shopping and relaxation areas in airports. Thanks to the upholstery volume, these slender benches offer a high comfort level.

V-Travel Soft Seating possibilities include:

- Power socket incorporated in the back, individual configuration possible.
- Various options for floor fixation, in order to maintain the desired airport layout.

Genaya

by brodbeck|koepp design

Genaya is more than just soft seating. The modular design of this soft seating line allows any interior to be freely configured, creating a space tailored to the needs of its users.

The modular Genaya system consists of 2, 3, and 4-seater sofas. 3,4-seater sofas are available with panels in two different heights. The sofas are also available in right and left versions. Additional system components include 2 and 3-seater pouffes and a double-sided sofas. Each of these models comes with a table on the right and/or left side.

To increase functionality, Genaya can be fitted with:

- Media ports
- Tables on right and/or left side
- Low or high panels
- Various glides options,
including ground-mounted.

Genaya by brodbeck|koepp design

The curves in the new Genaya line are designed to give a fluid, organic feel to a space, breaking up the linear look of traditional seating. The seating elements can be linked in a variety of ways to create circles, waves, or custom patterns, which not only encourages interior design creativity, but is also very useful in spaces with awkward corners and columns.

Constructed from high-quality, durable materials, the new Genaya modular soft seating line is designed to withstand heavy-duty use in the most heavily frequented areas - its robust construction ensures long-lasting performance. Built-in features, such as tablet and media ports, provide everything users need to stay connected and productive without leaving their seats.

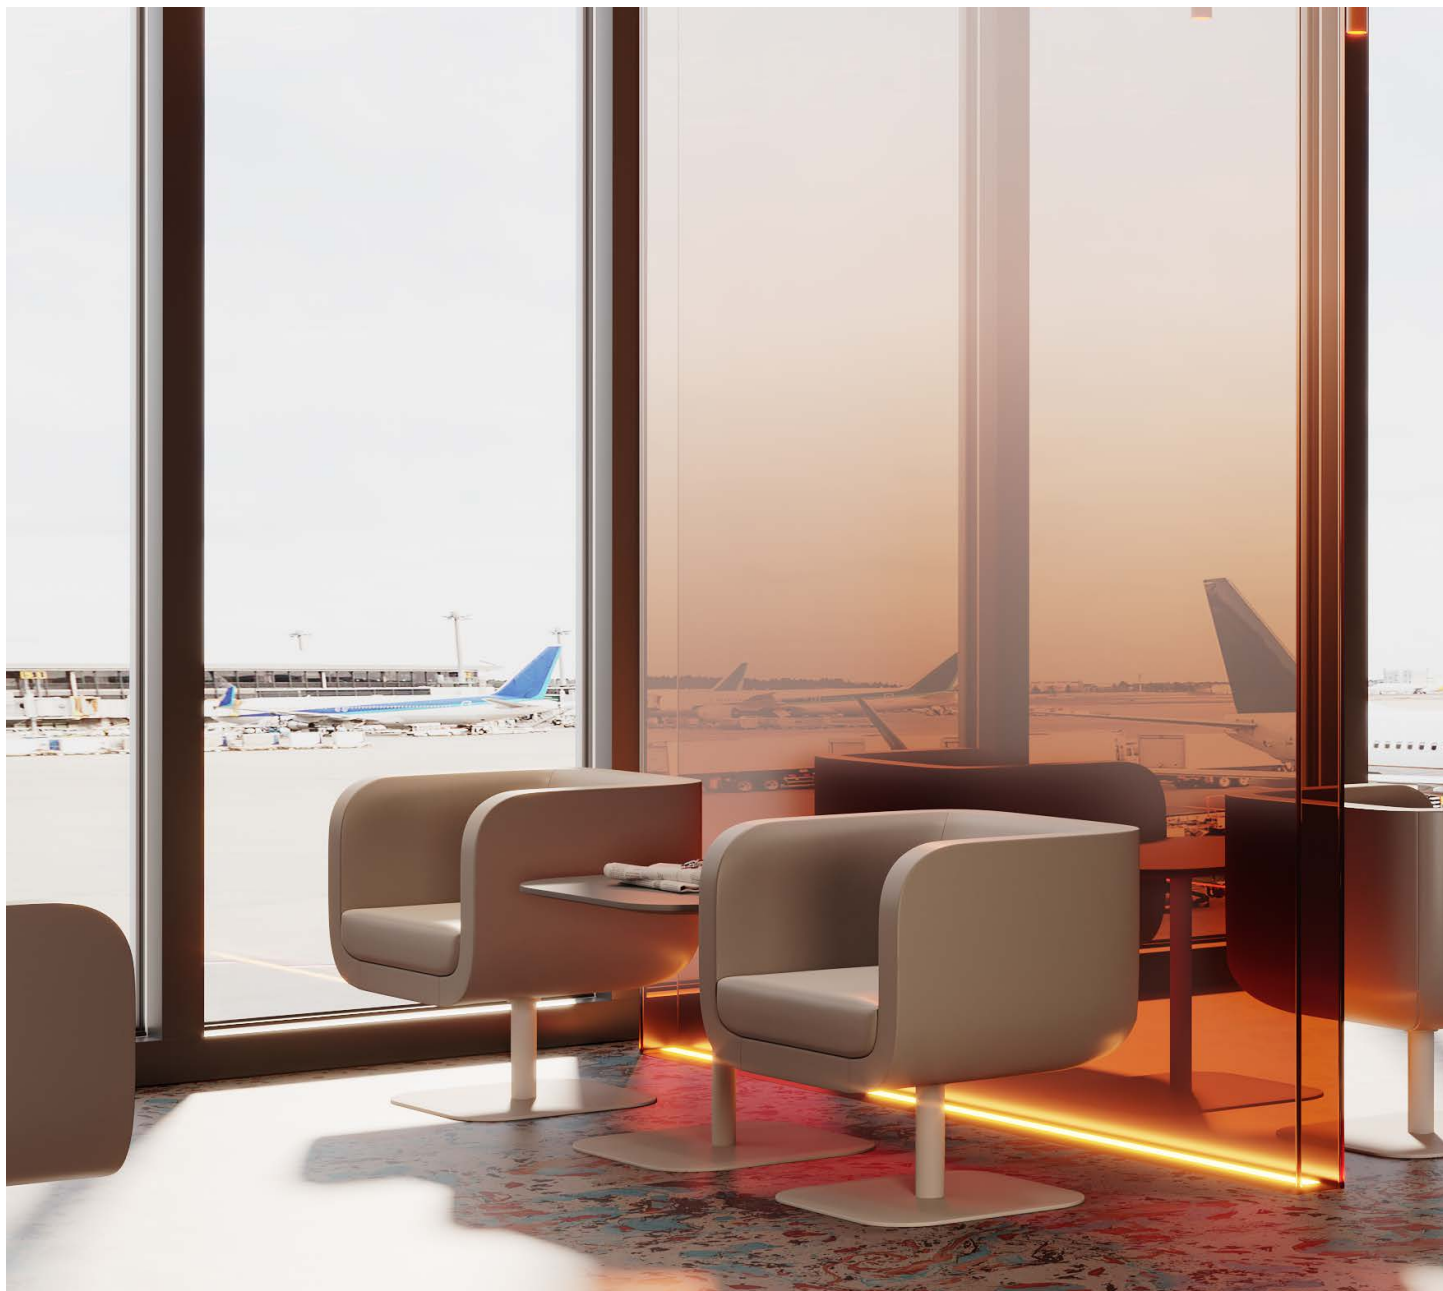

Bound

by Karim Rashid

Bound was created for those, who love to experience reality in a beautiful and emotional way. This soft seating collection comprises an armchair, sofa and table. Its reductive yet powerful design saturates any space with loads of emotions, making that place unforgettable.

Placed in public spaces such as airport lounges, Bound contributes to a more enjoyable travel experience.

Bound armchair swivels to follow the user's movements. Thanks to Bound's memory function, the armchair not only stands firm, but also automatically returns the seat shell to the default position after the user vacates the place.

Lupino

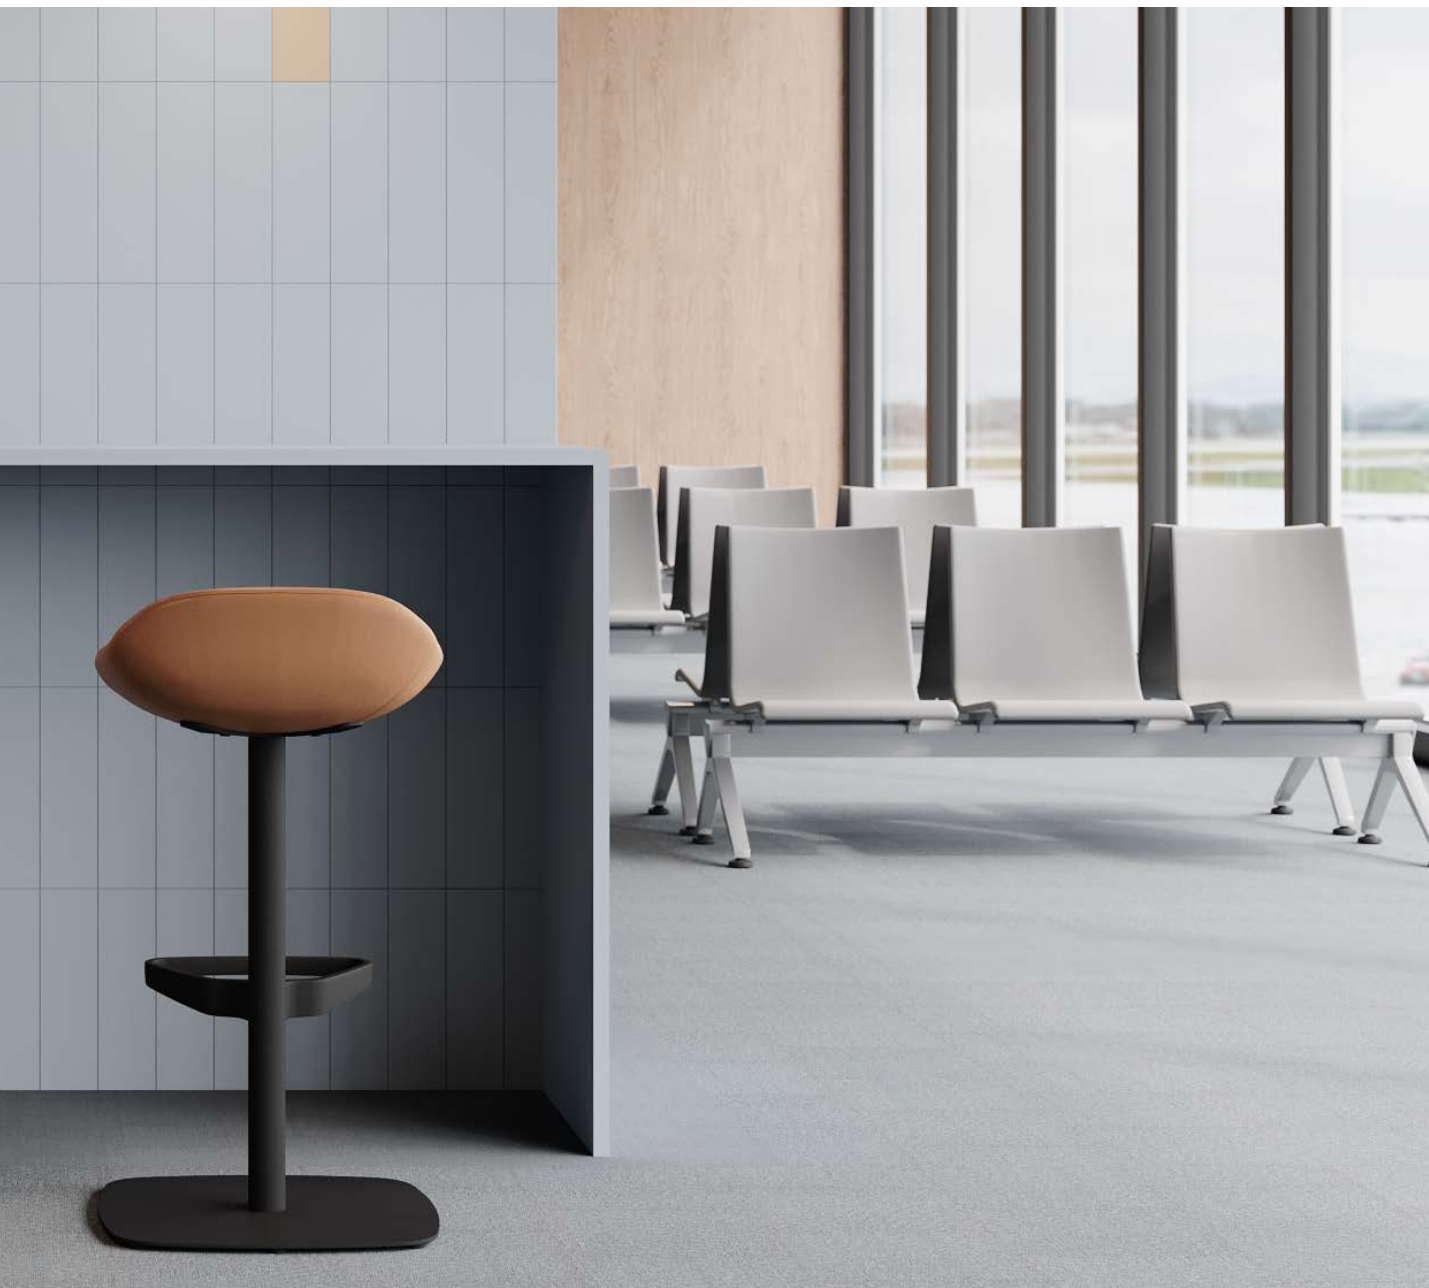

by Norbert Geelen

Characterised by an organic design language and sporty charms – this armchair reflects the dynamics of our time. Fresh, agile and somewhat cheeky. Offering a high level of individualisation through a fascinating number of options. Seat shell available in two heights, either with low or high arms. Several distinct frame variations. Multi-coloured surfaces.

Lupino Barstool on a plate base can be easily integrated into passenger terminal spaces, uplifting passengers experience to a higher level with its charm and durability.

Lupino Barstool also meets the safety requirements for public use, and provides 24/7 comfort for hundreds of passengers every day.

Colani

by prof. Luigi Colani

Reminiscent of the 60s. From 1968 until the beginning of 1969, Prof. Luigi Colani was employed as in-house designer at Kusch+Co. The seating he designed in this period appeals with its unique use of organic forms. His creations still hold the same fascination today as they did back then.

This exceptional easy chair is characterized by its ergonomic design, offering an outstanding comfort level. The flowing lines adds an energetic pizzazz, even to austere environments.

The Colani chair is a popular choice in airport areas due to its distinctive design, ergonomic functionality and exceptional durability.

Volpe

by Norbert Geelen

40

Progressive and dynamic. Seating in a highly individual design language with the appeal of a classic sculpture. Its elegant design is complemented by supreme comfort level. The one-piece seat shell is soft, moulding to the body, conveying a feeling of security.

The Volpe seat is pure elegance and comfort created for areas where passengers want to spend more time, such as relaxation areas, and VIP lounges.

MeeThink

design by Nowy Styl Design Team

41

Small and handy, it offers much more than you might expect at first glance. MeeThink table is the perfect companion for meetings in the restaurant, bistro or in the coffee point.

Range of dimensions is so big that making the best individual match is easy.

Tapa

design by Mac Stopa (a product of Nowy Styl)

The line of the Tapa pouffes has been designed to complement meeting spaces, thematic rooms, relaxation areas and kids zones. Their unique design adds an exceptional character to an interior, creating an attractive and comfortable informal meeting place.

You can have a few, more or many Tapa, depending on your needs and the space you have. Innovation is supported by interdisciplinary collaboration, new ideas created together and clashing viewpoints. Because the most brilliant ideas are hardly ever born at a desk.

uni_verso

by Norberg Geelen

These contract chairs have no limits to their application. A wide range of versions means functionality. With plastic seat shells, the extremely narrow visible edges of which provide a puristic, slender look. Or with wooden seat shells, tapered at the transition from seat to backrest. Whether with or without armrests, whether with or without upholstery – both series offer the right solution for every situation.

The versatile uni_verso Barstool by Norbert Geelen – the seat shell rests on a higher frame for a relaxed bar atmosphere. Either metal or wooden legs, with footrest as standard.

Offa

design by Nowy Styl Design Team

With Offa line, every place can be a job spot. This versatile line meets the various needs of users wherever they are. This applies to public and multifunctional spaces such as lounges and waiting areas at airports and cruise terminals.

Comta

by Kusch+Co Design Team

Comta stands for Communication Table.

These tables go beyond the usual dimensions.

The overall overlap provides plenty of legroom and freedom of movement. Trademark feature is the futuristic design language, characterized by slender, tapered legs in an unusual triangular shape. The slender legs give the impression that the table reaches for the sky.
