

care

Quick-ship series for healthcare facilities!

Due to the Covid-19 pandemic, healthcare facilities are in a race to set up new intensive care units and quarantine stations. Swiftness as well as uncomplicated handling have top priority in this case.

In order to be of assistance, we give our customers in the healthcare sector the opportunity to have a selection of our seating series 2200 ¡Hola! and 3650 Arn as well as the table series 3050 and 3650 Arn delivered within a few working days. These variations offer plenty of additional advantages that can possibly save lives.

For more information about the finishes, please contact your counsellor at Kusch+Co or send an e-mail to welcome@kusch.com.

Easy cleaning and disinfection.

These variations neither have open-pored wooden surfaces nor back slits, nor unsuited upholstered pads, nor finger traps, nor components that are corroded by disinfectants. All metal components are chrome-plated or anodised. The selected variations provide an unfavourable breeding ground for bacteria, germs and mildew and other contaminations, and as such minimizing the risk of infection trans-mission to patients with a fragile immune system and weak health, visitors and nursing staff.
